Library Management System

Sydney Lieske

Overview

The database is for a library's catalog of books, noting which ones are available and information about the book, such as:
- Author
- Publisher
- Number of copies available
- Title
- ISBN
- Genre
- Section in the library
- Borrowed date and return date

This database is available to the librarians, assistant librarians, and library members.
- Each has their own ID number (an EMPID and a MemberID, respectively).
- Members have an account with their date of birth, username, and password.
- Workers at the library have a libraryID, JobID, and JobType.

Business Rules

1. Each author can write 1 or more books.

2. Each member can have many checkouts.

3. One librarian can work at 1 book register.

4. Each book can have many copies.

5. Each book can be published by 1 publisher.

6. Each section is located at a library.

7. Many employees can work at a library.

8. Each library can employ many employees.

9. Each employee has 1 job.

10. Each library uses member accounts.
